Product Page: This Page allows the Users to view all the collection of Products/ Tools which are available on the site. They can do a quick search on the Type and Brand of their choice and the Page would display all the Products which fit into the category. The Users are also showcased Deals Of The day on various tools. On clicking, they would be navigated to the particular product's page. The Users can also filter out the products based on Price, Discount Provided on each product, Brands and Categories (use Cases). Each Product shown contains their Name, Price, and Image and a Quick View Button where a pop-up would appear allowing Users to view Multiple images and more information on the product rather than being navigated to an entire different Page. If the User is interested in a product, They select the Image and are navigated to the Single Products Page.

Single Product Page

Single Product Page: On this Page, The User views a single product's information. Multiple Images are showcased for the product. The following information would be displayed for each Product: Name, Short Description, Price, Average User Ratings for the Product (Out of 5) and the Quantity which can be chosen by the User. The User can either Add the Product to the Cart or Buy the single Product. They also have an option to put the product in their wishlist. Below each page, Similar products are showcased.

Checkout Page: This Page is divided into two sections:

1. Shipping Address: The Page prompts the user to enter all details like their name, contact information and the shipping address details.

2. Payment Method: The User has an option to either pay via Debit/Credit Cards or through third-party payment gateways like Gpay, Paypal etc. If they choose the Debit/Credit Card, they would be navigated to a page where they would have to enter their card details. If they choose the third-party payment options, they would be navigated to the third-party payment gateways.

The page also contains the Order Summary where the user can enter the Discount Code or redeem their gift coupon. Additionally, Total Price (Including Delivery Charges, Tax and Discount Price) would be displayed.

User Profile Page

User Profile: This Page displays the User's information. It is designed for each individual User. Their personal details like their Username, Email and Phone Number, Followers and Followings (These are gained in the Customer Forum) are displayed. They can view their public profile and also edit the information. On this Page, they can also view their previous orders, Track shipments of current orders, checkout their wishlist and customise their privacy and settings for the account. This page also displays the Customer stories which are posted by them on the Customer Forum.
